Any appreciation, arising due to the shifting of the security from HTM shall be ignored. The same methodology shall be followed for securities that are stripped from the AFS / HFT portfolio.
- iv Before a security is stripped, it shall be marked to market. Appreciation, if any, shall be ignored and depreciation, if any, shall be recognised, if the market value is lower than the book value. Such depreciation shall not be aggregated for the purpose of arriving at net depreciation / appreciation of investment under the AFS / HFT category. The book value / market value of the security, whichever is lower, shall be used to normalise the STRIPS.

- v Normalisation principle, on stripping / reconstitution shall be applied on the clean price of the security (without considering the accrued interest) as the accrued interest is booked as income / expenditure.
- vi Normalisation shall also be applied in the case of reconstitution (even when STRIPS are acquired from the market).

Chapter XII: Accounting and Provisioning

A. Income Recognition

150. A UCB shall recognize income on accrual basis for the following:

- (1) Government securities and corporate bonds, where interest rates on the instruments are predetermined, provided the interest is serviced regularly and is not in arrears;
- (2) Securities of corporate bodies / public sector undertakings in respect of which the payment of interest and repayment of principal have been guaranteed by the Central Government or a State Government, where interest rates on the instruments are predetermined provided the interest is serviced regularly and as such is not in arrears; and
- (3) Shares of corporate body / co-operative institutions, provided the dividend has been declared by the corporate body in its Annual General Meeting and the owner's right to receive payment is established.

151. Income from units of mutual funds (debt mutual funds and money market mutual funds) shall be booked on cash basis.

152. In respect of investments in government securities and approved securities, a UCB shall not capitalise the broken period interest paid to seller as part of cost but treat it as an item of expenditure under Profit & Loss Account.

Explanation: This accounting treatment does not take into account the tax implications and a UCB shall comply with the requirements of income tax authorities as prescribed.

B. Investment Fluctuation Reserve (IFR)

153. Creation of IFR and Minimum Requirement

- (1) A UCB shall make suitable provision for depreciation in the value of investments held under 'AFS' or 'HFT' categories out of its current profits (i.e., charge the same to the Profit & Loss Account) and show the same as 'Investment Depreciation Reserve (IDR)'.
- (2) In the event that IDR created on account of depreciation in investments, as provided in paragraph 153(1) above, is found to be in excess of the

required amount in any year, the excess shall be credited to the Profit & Loss Account and an equivalent amount (net of taxes, if any, and net of transfer to Statutory Reserves as applicable to such excess provision) shall be appropriated to the IFR Account.

- (3) In addition to as provided in paragraph 153(2) above, a UCB shall build IFR out of realised gains on sale of investments, subject to availability of net profit.
- (4) A UCB shall maintain minimum IFR of 5 per cent of the investment portfolio. This minimum requirement shall be computed with reference to investments in HFT and AFS categories. A UCB may, at its discretion, build up a higher percentage of IFR depending on the size and composition of its portfolio, with the approval of its Board.
- (5) A UCB shall transfer maximum amount of the gains realised on sale of investment in securities to the IFR until it meets the minimum IFR requirement of 5 per cent. Transfer to IFR shall be as an appropriation of net profit after appropriation to Statutory Reserve.
- (6) IFR shall be eligible for inclusion in Tier 2 capital.
- (7) A UCB shall ensure that the unrealised gains on valuation of the investment portfolio are not taken to the Income Account or to the IFR.

154. Draw-down from IFR

- (1) A UCB may, at its discretion, draw down the balance available in IFR in excess of 5 per cent of its investment in AFS and HFT for credit to the balance of profit / loss as disclosed in the Profit and Loss Account at the end of any accounting year. Such draw down from IFR shall be utilised to meet the depreciation requirement on investment in securities.
- (2) In the event the balance in the IFR is less than 5 per cent of its investment in AFS and HFT, a draw down shall be permitted subject to the following conditions:
 - i The drawn down amount is used only for meeting the minimum Tier 1 capital requirements by way of appropriation to free reserves or reducing the balance of loss, and

- ii The amount drawn down is not more than the extent to which the MTM provisions made during the aforesaid year exceed the net profit on sale of investments during that year.

(3) Accounting Principles

- i IDR required to be created on account of depreciation in the value of investments held under 'AFS' or 'HFT' categories in any year (as stated in paragraph 153(1) above) shall be debited to the Profit & Loss Account and an equivalent amount (net of tax benefit, if any, and net of consequent reduction in the transfer to Statutory Reserve) or the balance available in the IFR Account, whichever is less, shall be transferred from the IFR Account to Profit & Loss Account.
- ii The amounts debited to the Profit & Loss Account for depreciation provision and the amount credited to the Profit & Loss Account for reversal of excess provision (as stated in paragraph 153(1) and 153(2) above) shall be debited and credited respectively under the head 'Expenditure - Provisions & Contingencies'.
- iii The amounts appropriated from the Profit & Loss Account / to IFR, and the amount transferred from IFR to the Profit & Loss Account to meet depreciation requirement on investments shall be shown as 'below the line' extraordinary item after determining the profit for the year.

Explanation: IFR is created out of appropriation of net profits or reversal of excess IDR as provided in paragraph 153(2) and 153(3) above. IDR is a provision created by charging the diminution in value of investments to Profit and Loss Account. While the amount held in IFR shall be shown in the Balance Sheet as such, the amount held in IDR shall be reported as contingent provisions against depreciation in investment.

C. Non-Performing Investments (NPI)

155. In respect of securities where interest / principal is in arrears, a UCB shall not reckon income on the securities and shall also make appropriate provisions for the depreciation in the value of the investment. A UCB shall not set-off the

depreciation requirement in respect of these non-performing securities against the appreciation in respect of other performing securities.

156. The criterion used to classify an asset as NPA shall be used to classify an investment as Non-Performing Investment (NPI), i.e., an NPI is one where interest / instalment (including maturity proceeds) is due and remains unpaid for more than 90 days.
157. In the event the investment in the shares of co-operative institutions is valued at ₹1 per institution on account of the non-availability of the latest financial position in accordance with paragraph 68(3) of these Directions, those shares shall be reckoned as NPI.
158. If any credit facility availed by the issuer is NPA in the books of a UCB, investment in any of the securities issued by the same issuer shall also be treated as NPI and vice versa.
159. In case of conversion of principal and / or interest into equity, debentures, bonds, etc., such instruments shall be treated as NPA ab initio in the same asset classification category as the loan, if the loan's classification is substandard or doubtful on implementation of the restructuring package and provision shall be made as per the norms.
160. Government Guaranteed Investment
 - (1) Investment in State Government guaranteed securities, shall attract prudential norms for identification of NPI and provisioning, when interest / instalment of principal (including maturity proceeds) or any other amount due to the UCB remains unpaid for more than 90 days.
 - (2) A UCB's investments in bonds guaranteed by Central Government shall not be classified as NPI until the Central Government has repudiated the guarantee when invoked. However, this exemption from classification as NPI is not for the purpose of recognition of income.
